

Earth Day 2022

Invest in our planet

To celebrate Earth Day this year, we've asked each of our employees to commit to one of these five everyday actions to help the environment. We encourage you to join us too.

1

Power down and unplug your laptop overnight (for 8 hours)

If 5,000 people do this for a month, we would reduce carbon dioxide emissions by

647 metric tons.

That would offset the carbon footprint of **139 gas-powered vehicles driven for one year.**

2

Switch to a reusable water bottle instead of single use plastic bottles

That's a potential saving of **65,000 single-use bottles** and 11.7 metric tons of carbon dioxide emissions if 5,000 people do this for a month.

That's equivalent to the carbon footprint created by using over

1,300 gallons of gasoline.

3

Use a tote shopping bag instead of single use plastic bags

We would cut carbon dioxide emissions by **461 metric tons** if 5,000 people do this for a month.

That matches the carbon footprint of the electricity used by almost **90 homes over one year.**

4

Walk or cycle to locations that you would normally drive to every day

If 5,000 people left the car behind daily, there's a potential saving of 865 metric tons of carbon dioxide emissions.

With that, we would erase the carbon footprint generated by burning over

950,000 pounds of coal.

5

Eliminate meat from your diet one day per week

If 5,000 people do this for a month, we would save over

27 million gallons of water.

And reduce carbon dioxide emissions by **646 metric tons.**

That's equivalent to the carbon footprint generated by charging 78 million smartphones over the same time period.

At Korn Ferry, we're committed to improving our environmental sustainability and leading by example for our clients worldwide.

Did you know...

We set a target to reduce our Scope 1 and Scope 2 greenhouse gas emissions for our global offices by **30% by 2025** (compared to 2019 levels).

We invest in carbon removal and avoidance projects.

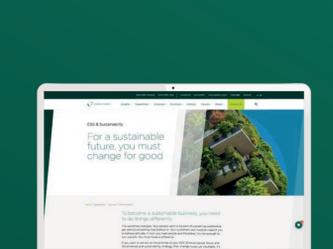

We publicly report our Scope 1, 2 and 3 greenhouse gas emissions data.
